Clean Energy

Clean Energy and Sustainability Analytics Center

Research and A</La.btsae5 Tc 0.015 Tw 14ngisoAnalytiSxdes /F

Approach

- We encourage collaboration between energy stakeholders and policymakers.

- We gather and analyze data to develop clean energy pathways that can be used for informed decision making.

- We generate Computable General Equilibrium-based Integrated Energy Environmental Economic models that can be used for energy and environmental planning in New Jersey.

- We foster faculty and student research in the area of clean energy and sustainability analytics.

- We assist policymakers, business and organizations in developing clean energy and transportation initiatives in the state and act as a resource hub regarding state regulatory and incentive policies.
